

Seamless commercial-grade aluminum hood provides extra durability

Adjustable solar panel ensures maximum power output

16, 32, and 48 watt models are available with either affixed or remote panels (The 65 watt model comes only with a remote panel, due to its weight.)

Motor isolation bracket ensures quiet motor operation

5-Blade aluminum balanced fan

Stainless Steel wire screen keeps out critters and debris

Commercial grade circular flashing allows unit to be turned 360° during installation to optimize sun exposure

At Kennedy Skylights, our mission is to provide eco-friendly products using the finest quality materials to meet or exceed Florida Building Code requirements. All products are hurricane tested and approved. Visit www.kennedyskylights.com for more information.

Roof Mount Residential Unit
(16, 32, 48, or 65 watt)

Curb Mount Commercial Unit
(16, 32, 48, or 65 watt)

Gable Mount Unit
(16, 32, 48, or 65 watt)

Is Attic Heat Destroying Your Home?

Attic venting is an important aspect for maintaining a healthy, energy-efficient house. The Kennedy Skylights' Solar Attic Fan works with your existing passive vents to improve attic air circulation.

Benefits of Attic Venting:

Extends the Life of your Roof...

Lowers heat build-up on roof shingles and underlayment.

Reduces the Load on your HVAC System...

Saves money on utility bills during hot summer months, and reduces wear on your A/C unit.

Prevents Damaging Ice Damming...

The lack of air circulation can create "hot spots" which causes snow to melt unevenly resulting in ice forming on gutters and eaves.

Reduces Moisture Build-up in the Attic...

Excessive moisture trapped in the attic causes a variety of problems including rust, wood rot, and insulation damage. Reducing moisture eliminates the growth of mold and fungus which can cause respiratory problems.

Increases Fresh Air Circulation...

Reduces the vapor build-up generated by everyday activities such as showering and cooking.

Smart, Eco-Friendly Home Solution

Kennedy Skylights' Solar Attic Fan is a simple and environmentally sensible solution that can protect your home and save you money. Powered completely by free solar energy, this sleek and efficient vent is both compact and quiet. And let's not forget powerful! The 65 watt model vents up to 3,350 square feet. Solar Attic fans can also be installed in workshops, lofts, storage sheds, garages, barns—any structure that would benefit from improved circulation.

Roof Mount
(16, 32, 48, or 65 watt)

Gable Mount
(16, 32, 48, or 65 watt)

Model Size	cfms Output	Venting Capacity
16 watt	up to 1,184 cfms	up to 1,300 sq. ft.
32 watt	up to 1,560 cfms	up to 2,200 sq. ft.
35 watt	up to 1,597 cfms	up to 2,550 sq. ft.
48 watt	up to 1,881 cfms	up to 2,825 sq. ft.
65 watt	up to 2,105 cfms	up to 3,350 sq. ft.

Solar Attic Fan Models

Designed for all types of applications, the Solar Attic Fan is available in three mounting types. The roof mount and gable mount are generally for residential use. The curb mount is generally for commercial use but can also be installed on homes. Units may be ordered in gray, black, bronze, or other custom colors.

Curb Mount
(16, 32, 48, or 65 watt)

Kennedy Skylights... The Better Choice

When investing in a product to improve your home and quality of life, you want assurance it's performing efficiently and effectively. Kennedy Skylights combines precision-designed components with advanced engineering to produce a unit that far surpasses industry standards.

Steep Roof Position

Medium Slope Position

Flat/Low Slope Position

Adjustable Solar Panel

The 16, 32, and 48 watt roof and curb mounted models are designed with a sturdy, adjustable bracket allowing the solar panel to be positioned at various angles for optimal solar exposure.

Maximum Air Flow

The unit is engineered to minimize obstructions in the fan housing to increase air flow. It also incorporates an angled throat to facilitate a *Venturi* or suction effect which increases cfm output and also reduces wear on the motor.

Solar Panel Performance

As a solar panel heats up, it becomes less efficient in converting light into electricity. The Kennedy Skylights' Solar Attic Fan 16, 32, and 48 watt models have the panel slightly elevated above the unit's hood to keep both the panel and the hood cooler. Better air circulation means better performance.

Quality Components and Sleek Design

The Solar Attic Fan is built in the U.S.A. using only the highest rated materials under rigorous quality control standards. These low-profile units are made from seamless, commercial-grade aluminum.

Easy Installation and No Maintenance

Fully operational right from the box, it installs easily with no electrical wiring and no expensive electrician. Once installed, the unit is weather-tight and maintenance-free.

Limited Lifetime Warranty

On all components including the solar panel and the motor!

HURRICANE TESTED & APPROVED

Eligible for Federal Tax Credits

Kennedy Skylights is committed to manufacturing quality, environmentally responsible products that provide energy savings for our customers.

Our Solar Attic Fans are eligible for Federal Tax Credits as defined in the **The Energy Policy Act of 2005** as a Residential Photovoltaic System.

Ultra-Low Profile and Tile Roof Models

- These fans are made from Seamless, Commercial Grade Aluminum
- Powder-coated inside and out for corrosion & rust resistance
- Non-adjustable panel provides extra durability against high hurricane and tornadic winds
- Allows for panel replacement without having to replace the entire unit
- Available in black 35 watt models with the same outstanding Limited Lifetime Warranty
